

Exporter Plus

HD Radio Exporter

HD Radio Exporter Front

Exporter Plus Overview

Utilizing a 100% solid state architecture, the Exporter Plus offers a simple and cost effective means to transition your station to HD. All software is embedded within the exporter's flash-based memory, eliminating the need for failure prone PC components such as a HDD or CD-ROM. The robust flash-based architecture also means fast AC recovery and significantly improved tolerance to AC power line transients.

Exporter Plus Quick Specs

- Full featured front panel control
- Web based user interface
- Integrated GPS receiver
- 1U chassis
- Input/Output: Digital In, Analog In/Out, Monitor Out, USB, 2xRJ45, 10MHz out, 44.1 kHz out, remote In/Out
- Front panel Headphone jack for convenient monitoring of digital and analog audio.
- Power failure tolerant
- Robust firmware based solution
- Easy firmware upgrades
- Supports AM and FM IBOC
- 19" wide, 1.75" high, 16" deep
- Optional GPS based network time server

The Exporter Plus provides users with a full-featured front panel that includes a headphone jack, for convenient monitoring of digital or analog audio, and an LCD user interface with live audio peak and RMS level meter. The Exporter Plus also features a web based UI enabling remote operation from any web-interfaced PC or handheld device.

The Exporter Plus encodes main program service audio and combines it with audio and data services from the Importer. Dual ethernet interfaces support IP routing, which can be used to enhance the robustness of streaming HD IP data. The Exporter Plus is fully compatible with Nautel's award-winning Reliable HD Transport protocol.
