The Road Ahead: HD Radio in 2014

An HD Radio equipped car rolls off the line every 4.5 seconds. Are you on the road to HD Radio broadcasting?

Maybe you're turning on an HD station for the first time. Or possibly you're increasing the power of your existing digital signal or adding multiplexed channels. Or maybe you just want to know that the investment you're making today can get you to digital someday.

Nautel has you covered thanks to field proven, high performance HD Radio solutions you can trust.

Nautel PhoneHome™

Nautel PhoneHome, winner of Radio Magazine's 2012 Pick Hit Award, is now available on the latest Release 4.0 software for NV, NVLT and VS. Here are a few reasons to activate it now:

- Fast evaluation and recognition of problems.
- Analyze transmitter data; both live and historical.
- Solve issues faster with accurate historical data.
- Leverage data for trending and forecasting.
- No firewall issues.
- Allow Nautel to see reliability trends sooner.
- Reduce off-air time with more accurate trouble-shooting information.

Peter's Fireside Chat

In some industries it's common place for installed equipment to automatically begin transmitting diagnostic information to the manufacturer as soon as the equipment is placed on the internet. We'd like to know how you feel about this trend.

Nautel's [PhoneHome](#) service enables our Customer Service Technicians to use the vast amount of data collected by your Nautel transmitter to provide you with even better levels of service. If enabled by a broadcaster, PhoneHome proactively sends operational information to our Customer Service group via the internet. Note that PhoneHome is designed to live behind your firewall.

Currently PhoneHome must be consciously turned on by the transmitter operator. We purposely designed it this way because we are sensitive to these data protection concerns. However, experience from other industries tells us that significantly enhanced customer service can be provided via a product like PhoneHome, while still protecting the security of data.

Thank you for helping us improve our products... for you.

NUG: Nautel Users' Group - Why Join?

The Nautel Users' Group is over 20 years old and exemplifies our culture of supporting our customers 120%.

UPCOMING EVENTS

ABU, Mar 4-7
Kuala Lumpur, Malaysia

CABSAT, Mar 11-13
Dubai, UAE

GLBC, Mar 11-12
Lansing, MI

NAB, Apr 6-10
Las Vegas, NV

[Annual NUG - Register!](#)
[Post-NAB Training - Register!](#)

Broadcast Asia, Jun 17-20

Membership in the NUG gives you technical content, education, and a way to connect with your peers to get more out of Nautel's platforms, products, and technologies. You get online access to a restricted NUG Member-Only area with product documentation, FAQs/troubleshooting, special NUG discounts on select training programs, an online forum, and invitations to NUG events. [Join the NUG Now >](#)

Our 2012 and 2013 NUG events were attended by over 200 people; and over 70% of them rated the events as 'Critical to Attend.' Attendee comments include, "1st time attending – will not miss it again." and "Great presentations, good information. Looking forward to next year."

Post-NAB Training - 80% Full!

Nautel's annual [Post-NAB Training](#) is filling up; in fact we only have a few spots left!

Each year Nautel opens its doors after NAB and invites people to stop by Nautel for complimentary training on their way home. This highly-valued, three-day training course covers a range of topics including site preparation, Nautel equipment and software, digital radio and more.

If you'd like to learn more and reserve your seat for the 2014 program, please contact [Christy White](#) directly at 1-877-662-8835.

Customer Story: Going Green on the Air Waves with NVLT

Independent broadcaster, 3NNN Edge FM, has taken a green leap of faith and is the first broadcaster in Australia to install a Nautel NVLT Series transmitter with a second one ready to go for sister station 102.5 Classic Rock in Deniliquin, NSW.

"The decision to purchase the Nautel NV10LT was based on the potential for considerable power savings compared to our existing transmitter." said Frank Davidson, Edge FM General Manager.

Marina Bay Sands, Singapore

IBC, Sep 12-16
Amsterdam, The Netherlands

Top Articles from 2013

Propagation Tool: New Features

Nautel's Propagation Tool allows broadcasters to analyze approximate coverage of FM and TV stations. Last June, we added new 'custom' selections which enable you to fine-tune the settings for your application.

Spotlight on Dennis Covill

Back in February, we proudly announced that Nautel founder Dennis Covill had been appointed as a Member of the Order of Canada for his contribution to engineering and science.

[Read the story behind Dennis Covill >](#)

LPFM Corner by Christy Lynn White

The big question everyone was asking in November when the LPFM window closed was how long it would take for the FCC to issue construction permits (CPs). I think that most would agree that CPs are being issued faster than many had expected, with just over 900 LPFM CPs issued as of February 14th.

With CPs issued, many stations are putting their plans in to action; that means getting ready to buy their equipment, including transmitters. While Nautel can't help you decide what content to put on the air, we can help you sound the best! Our transmitters offer optional built-in Orban Inside audio processing, remote control through AUI software, built-in USB back-up, and more.

Hear more on the VS300 LP features in Nautel's recent webinar, available for viewing online, "[Saving Money with Nautel's LPFM](#)

[Transmitter](#)". Another useful resource is Radio World's [LPFM e-book](#).

If you want to learn more about Nautel's [VS300 for LPFM](#), or contact [Christy White](#) directly at 1-877-662-8835.
