Tips 'n Tricks by Jeff Welton

Jeff details how to build an RF current probe. In AM sites, this can be very useful in many ways. First, to check for the presence of RF on a wire, and to adjust tuning to null or peak the current flow. It's also a good way to check RF currents in ground radials to see if you've got a broken radial.

Submissions for this Tips 'n Tricks column are encouraged and if published you'll receive a Nautel T-shirt. Submissions should be typed and emailed, with high resolution photos, to info@nautel.com using the subject line Tips 'n Tricks.

Digital Radio Showcase by Hal Kneller

In this issue Hal discusses:

- DRM Consortium Event at NAB
- Post-NAB DRM General Assembly
- DRM30 Rollout in India
