Introducing New NX Series 5 & 10 kW AM Transmitters

Introducing the industry's most advanced 5 and 10 kW AM/MW transmitters.

Based on proven NX technology with over 20 Megawatts deployed, highlights include:

- Outstanding Control
- 86% Efficiency
- Digital/Analog
- Compact - Small Footprint
- Powerful AUI & Built-in Instrumentation

New "Print Report" Feature in RF Toolkit Coverage Tool

Thanks to great user feedback, we've enhanced our RF Toolkit Coverage Tool with a Printable Coverage Report feature. It provides a printable report, consisting of a chart of the technical parameters selected including both the area and population within each selected contour, a zoomed in coverage map, and a zoomed out coverage map to make it easier to locate. If you use the Chrome browser, you should be able to save the report as

iPad mini

WIN an iPad Mini

Submit a qualifying story about how you use Nautel's award-winning AUI; benefits, challenges overcome, etc. Odds of winning usually around 1 in 5!

[Tell us your AUI story now!](#)

[Play Nautel YouTube Videos >](#)

Nautel@NAB Sneak Peak

Are you heading to NAB? If so, we're looking forward to seeing you at Sunday's [Annual NUG Meeting](#) and our booth C2139.

This year, booth highlights include:

- New NX Series 5 and 10 kW transmitter live demos.
- New compact GV30 of the award-winning GV Series which offers the highest IBOC performance and efficiency with powerful new instrumentation and capabilities.
- Learn why Nautel is the leader for HD Radio™ performance.
- New compact 1 kW digital UHF TV transmitter with OPTIPOWER efficiency.
- NVLT and VS transmitter demos.
- Live demos of HD Radio, DRM, AUI and PhoneHome.

Also, don't miss the **On the Road to Broadcast Innovation with HD Radio™ Technology** event in our booth on Tuesday, April 14 at 3:00pm with special guest Bob Struble of iBiquity. A look at how HD Radio broadcasting is a driver for innovation by manufacturers, the auto industry, broadcast groups and individual broadcasters.

LATEST SOFTWARE

Post-NAB Training: April 20-22

Would you like the opportunity to see Nautel and meet our people, to learn more about Nautel equipment and software directly from our technicians and engineers? Then join us for our **Complimentary Post-NAB Training**.

Every year we open our doors after NAB and invite you to stop by for complimentary training on your way home. This highly-valued, three-day training course covers a range of topics including site preparation, Nautel equipment and software, digital radio and more. [Spaces are limited, sign up now >](#)

"Everything was relevant. Great job!! I wouldn't change anything."
"Knowledgeable presenters and useful information!"

Customer Story: GV10 for High Efficiency & Reliability

Family FM 99.5 is the first station in Cambodia to install a new Nautel GV10 transmitter.

FEBCambodia working with the support of FEBC's International Support Team chose the GV primarily because of its high efficiency.

Nautel is now FEBC's standard transmitter for FM.

"Now that the Nautel is on line, our support guys will enjoy far fewer emergencies." Guy J. West, International Service Coordinator, FEBC

LPFM Corner by Christy Lynn White

2015 is going to be a busy year for build outs; or rather "[LPFM on Fire](#)" as Radio World has appropriately named its recent eBook. Nautel has helped many LPFMs get on air with our VS300LP transmitter, and more stations are moving from CP to licensed every day.

Christy Lynn White
LPFM Specialist, Nautel

The VS300LP transmitter is even better!

We are happy to announce that it will now operate at 110 V. Prior to this change, users were required to operate using 220 V or purchase a step-up transformer, but not anymore.

To learn about this change and more, join me on April 1st for a walk-through of the advanced features of the VS300LP. I will go over many features and provide a live Advanced User Interface demo. [Register for this LPFM webinar now >](#)

For more information on the VS300LP contact Christy White directly at 1-877-662-8835 or christy.white@nautel.com
