## Top Article: AUI - Award-Winning Control at Your Finger Tips

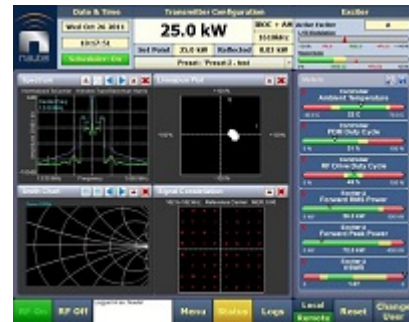

Nautel's award-winning Advanced User Interface (AUI) places more control and monitoring at the engineer's finger tips than ever before. Whether local or remote, the AUI ensures fast diagnosis of issues, and provides information that allows engineers to be more proactive and ultimately avoid trips to the transmitter site.

AUI functionality includes:

- Built-in commercial grade instrumentation
- 100% remote access
- SNMP support
- Instrument grade audio spectrum analyzer
- Comprehensive monitoring and control
- Extensive logging of all events
- Email notifications
- Presets and easy transmitter control
- Enhanced support services

## Top Customer Story: Phone Home Eases Remote Resolution

Like many station operations, Northwestern Media staff is spread quite thin. While their engineer was out of town, Nautel Phone Home technology eased a PA module resolution on KFNW's NX50 50 kW transmitter... and on a Sunday no less!

"Recently while I was out of town, I experienced the power and convenience of Nautel Phone Home in real-time at the NAB show. Thank you for your excellent product line and customer service." Gary L. Ellingson, Director of Engineering.
