

## Hello

In this issue we summarize our news from NAB and announce new webinars.

Do you have an HD Radio™ or Translator user case you'd like to share? We'd love to hear from you! Every qualifying story will be entered to win your choice of an iPad mini, a Sonus Play:1 wireless speaker or an Amazon Echo. Odds of winning is usually around 1 in 5!

We are especially interested in stories related to the current wave of HD Radio installs that have occurred over the last 18 months. Or possibly you are doing some interesting things with HD Radio formats or ways to monetize your digital channels? We're also interested in translator stories.

[Submit your story](#) and we'll publish it in a future issue.

## Chuck's Reflections on NAB

Apart from the fun of seeing so many friends, and the agony of the toes each evening, I was struck at this year's NAB by the feeling that somehow, HD Radio™ has turned a corner.

In past years, HD Radio was an important technology in certain markets with the destination of analog plus HD1, HD2 and HD3 and maybe some traffic data. This year though, there was all that, plus two new ideas, both spawned from the fertile mind of our Philipp Schmid.

### Andy's NUG Meeting Wrap-Up

With over 300 in attendance at this year's annual NUG@NAB event, it was fantastic to see such large participation from our customers and was a wonderful opportunity to meet with both old and new friends.

I met customers who've never missed a NUG meeting and said it's the MUST-attend part of NAB, others came by our booth to apologize for missing it for the first time. Our presenters were well received; we were told they accurately reflected what's happening at Nautel and in the industry.

### Christy's Post-NAB Training Wrap-Up

Nautel hosted another successful Post-NAB Training session welcoming 18 participants from the United States, Canada, Brazil, Mexico and the Philippines to our head office in Hackett's Cove, Nova Scotia.

In this annual event, participants spend three days hearing from experts at Nautel covering a variety of topics. However, we think the best part of the training is the conversations that happen outside the classroom. The training provides an opportunity for Nautel users to share their own tips-n-tricks with each other outside the classroom.

### LPFM Corner by Christy Lynn White

With Spring here, it's build season for many LPFM groups trying to get on the air for the summer, and Nautel is here to help. We are currently offering new LP stations an Orban Inside processing card at no charge with the purchase of their transmitter. [Learn more here >](#)

The VS transmitter’s Advanced User Interface (AUI) offers a range of features that users are taking advantage of; offering built-in instrumentation, metering, logging and more. Check out the [AUI features in this video](#), or read AUI testimonials from users [at the bottom of this page](#).

### TV Update by Fred Baumgartner

Between repack and ATSC 3.0, the next few years are likely the most tempestuous in North American broadcast’s brief century. It didn’t go without notice among some at NAB that the new TV might be a path for good old radio too. In this issue Fred explains why.
