

VX BETA TRIALS

Nautel's new VX Series, offered in power levels of 150 W to 6 kW, are now in pre-production and progressing well as we move into low power beta trials. Winning Best of Show awards at both NAB and IBC, these analog FM transmitters offer a compact, serviceable and affordable design architected for long service life and lowest cost of ownership.

WUKY HD UPGRADE

New GV transmitters part of station's all-digital transition

Central to this HD upgrade was WUKY's transmitter choice: a 30 kW Nautel GV30 for the main site and a 10 kW GV10 for the auxiliary site. Implementation was without any major issues and WUKY is thrilled with the quality of its new HD signal.
