

JUST ADD AUDIO 2024

Last NAB, Nautel announced its GV2 Series that can integrate all HD Radio™ components inside the transmitter. Digital deployments become much simpler when the Gen4 Importer, Exporter, Exgine and even Omnia for Nautel audio processing are integrated without any additional hardware.

2024 will be a big year for this industry-first approach with our first customers going on-air as we head into this year's NAB.

AWARD-WINNING VX

1,000 VX Thanks!

Thanks to the confidence you've placed in Nautel's newest FM transmitter family, the VX Series is approaching 1,000 installs since its launch. There is a VX for every power level from 150 W up to 6 kW. To ensure these systems are installation and service friendly, we separated the higher power systems into light-weight exciter and power amp modules. That's back-friendly thinking.

HD RADIO EVENT

Monday, April 15, 4:00-6:00 PM
in the Nautel booth W3042.

VISIT NAUTEL (W3042)

Nautel Excitement in West Hall

Nautel is back at NAB with our industry 1st complete HD Air Chain inside GV Series transmitters. We'll also have a large showing of 150 W to 6 kW VX FM transmitters, as well as main/standby demonstrations.

Nautel's new AUI will be shown on multiple transmitters including the GV, VS and VX. For AM, check out the NX Series with MDCL power savings of up to 77%. And this year there will be a couple of announcements that we're saving for the show. See you there!
