# **Omnia** For Nautel

Nautel's Software-Based Air Chain incorporates premium virtualized audio processing, Omnia for Nautel<sup>\*</sup>, that eliminates the need for additional external hardware boxes. Audio input is via Livewire AoIP.

## **Rich Feature Set**

- Undo
- Phase Processing
- Downward Expanders
- Input AGC
- Wideband AGC 1/2/3
- Stereo Enhancer
- Multiband AGC
- Band Mix
- Final Limiter

Omnia for Nautel offers a comprehensive suite of audio processing and Livewire<sup>®</sup> AoIP inputs for all FM+HD1, 2, 3, and 4 audio streams. When integrated with **Just Add Audio**, Nautel's software-based air chain architecture, the FM/ HD blend drift is eliminated. Omnia for Nautel can be hosted on the **GV2 series transmitters,** the first in the industry capable of integrating all HD Radio components inside the transmitter.

#### Looking for HD2-4 Audio Processing on your Nautel HD Multicast+?

For legacy Exgine-based HD installations with external FM/HD1 audio processing, Omnia for Nautel offers processing cores for individual HD multicast channels (HD2-4).
