

## **Electronic Test Technician**

***(Location: Nautel Maine Inc, Bangor, Maine)***

*Nautel is an award winning company, that is fortunate to be in an industry that serves the needs of millions of people around the world by supporting the delivery of news and vital information, as well as entertainment, critical to their everyday lives. Being a company that prides itself on being at the cutting edge, we expect the same of our people. We encourage new ideas and innovative thinking. Nautel is a company where employees work within a team-based environment, regardless of location, where the efforts of every team member count.*

**Electronic Test Technician:** This hands-on role is located in our manufacturing facility, based within our Test Room. This team is responsible for the electronic test of products. Responsibilities will include:

- Tuning and aligning frequency dependent sub-systems;
- Testing and troubleshooting of AM / FM broadcast transmitters and associated equipment;
- Testing and troubleshooting field returns;
- Working across the organization to resolve any issues;
- Interfacing with customers during Factory Acceptance Testing.

*Candidates for the role should:*

- Have a technical diploma and, ideally, experience in: working with analog, digital, and power electronic circuits and systems; working with RF systems (MF, HF, VHF); using electronic test equipment; testing and troubleshooting to the component level.
- Be able to troubleshoot and provide solutions to problems;
- Have the ability to read blueprints;
- Be able to communicate effectively;
- Work well in a team environment, as well as use your own initiative;
- Be willing to learn new skills and take on additional responsibilities.

Interested applicants should submit their transcript, cover letter and resume to [hrnautel@nautel.com](mailto:hrnautel@nautel.com)
