BOOTH GUIDE C2546

NX Series

NX Performance. Now in Low Power.

1 kW and 2.5 kW Digital/Analog
AM Broadcast Transmitters

World's Largest FM/AM Manufacturer

100% North American Owned

Reliable Products. Reliable Company.
Trusted by engineers—year after year.

1 NX Series: NX Performance. Now in Low Power.

NX1 and NX2.5 are true extensions of Nautel's proven NX Series, bringing the same ultra-linear modulation architecture, digital transmission, and operational reliability used in high-power NX installations worldwide to 1 kW and 2.5 kW transmitters.

MDCL power savings

Current MDCL modes can create enough power savings to pay back the transmitter purchase in as little as 3-5 years.

Up to 77% power savings

AM Savings Calculator

2 AUI: Advanced User Interface

A totally rewritten AUI with an all-new operating system and architecture that will be standard on all new Nautel transmitters. See the New AUI in action on GV, GV2, & VX transmitters.

4 NVLT Series

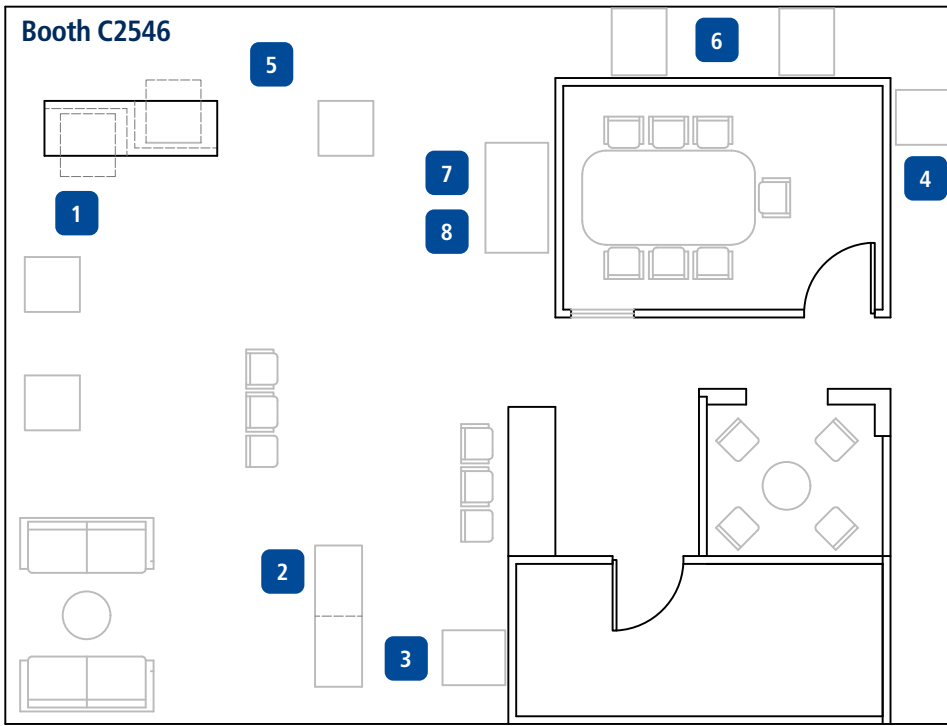

NVLT Series transmitters are affordable transmitters for analog/digital FM broadcasting. Based on a proven architecture, they're built tough with parallel power amplifiers, parallel power modules, and hot-swap power supplies.

Upgrade to a Nautel **solid state** and we'll **buy back** your last tube. Up to **\$10,000!***

5 VX Series 150 W – 6 kW FM Analog Transmitters

VX Series

11 analog FM transmitters with outputs of 150 W to 6 kW. The VX Series offers advanced control and instrumentation in a compact footprint with state-of-the-art DSP, power supply, and FET technology.

VX Audio Player and AoIP Streaming Back Up

In addition to built-in audio player and playlists, the VX natively supports Shoutcast, Icecast, & HLS streaming inputs

Main/Standby & N+1

Looking for the ultimate On-Air dependability? Check out the SC4 and VS-TC main/standby controllers from Nautel.

6 Rev up your Revenue Engine

Visual Radio puts your station on the auto dashboard. In-car data proves performance and supports new revenue.
